Virtual internship

Did you know that thanks to new technologies you can do a
VIRTUAL INTERNSHIP ABROAD?

Our **Moblend** project brings schools, students and businesses
together to create something unique: a period of virtual mobility.

[>>>check our compendium of best practices](#)

A Virtual internship is:

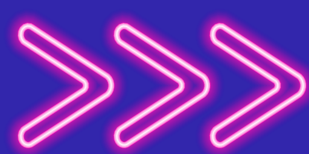

- **Formative:** allows students to acquire skills in the work environment but also in digital
- **Recognized:** The mobility period is as valid and recognized as an in-person one
- **Enriching:** encourages the internationalization of schools and businesses
- **Inclusive and accessible:** allows students who cannot travel for various reasons to work in a company abroad
- **Environmentally friendly:** no need to travel and pollute, we are on the side of the environment!
